

FIG. 01 • THE HIDDEN BILL

The cheapest
build usually
isn't cheap.
Here's the
real invoice.

What actually gets paid for

The original build.

Feels affordable.

The rework later.

Costs more than the first attempt.

Months of no launch.

Lost momentum and revenue.

Lost trust with users.

Impossible to price.

ILLUSTRATIVE PATTERN

*You didn't
overpay for
good code.
You **underpaid**
and bought
rework.*
